# DESK RESEARCH

## Manchester Triage System

Source: <https://www.youtube.com/watch?v=MlIpEzyMq-Y>

Number, name, colour, minutes

• 1 immediate	0	
• 2 very urgent	10	
• 3 urgent	60	
• 4 standard	120	
• 5 non-urgent	240	

### General discriminators

- Life threat – ABC - Red
- Conscious level – fitting, altered level, history
- Haemorrhage – exsanguinating, major, minor
- Temperature – very hot (41°C), hot (>38.5°C), warm (<38.5°C)
- Pain – severe, moderate, recent
- Acuteness – abrupt (seconds minutes), acute (24 hours), recent (7 days)

### Red (1) discriminators, LOC

- Currently fitting adult
- Unresponsive child
- Currently fitting child

### Orange (2) discriminators

- Altered level of consciousness
- Child responds to voice or pain
- Uncontrolled major haemorrhage
- Very hot person over 1 year of age (T > 41°C)
- Hot baby 0 – 1 year (T > 38.5°C)
- Cold person (T < 35°C)

### Yellow (3) discriminators

- History of unconsciousness in adult or child
- Uncontrolled minor haemorrhage
- Hot (over 1 year) (T > 38.5°C)
- Moderate pain

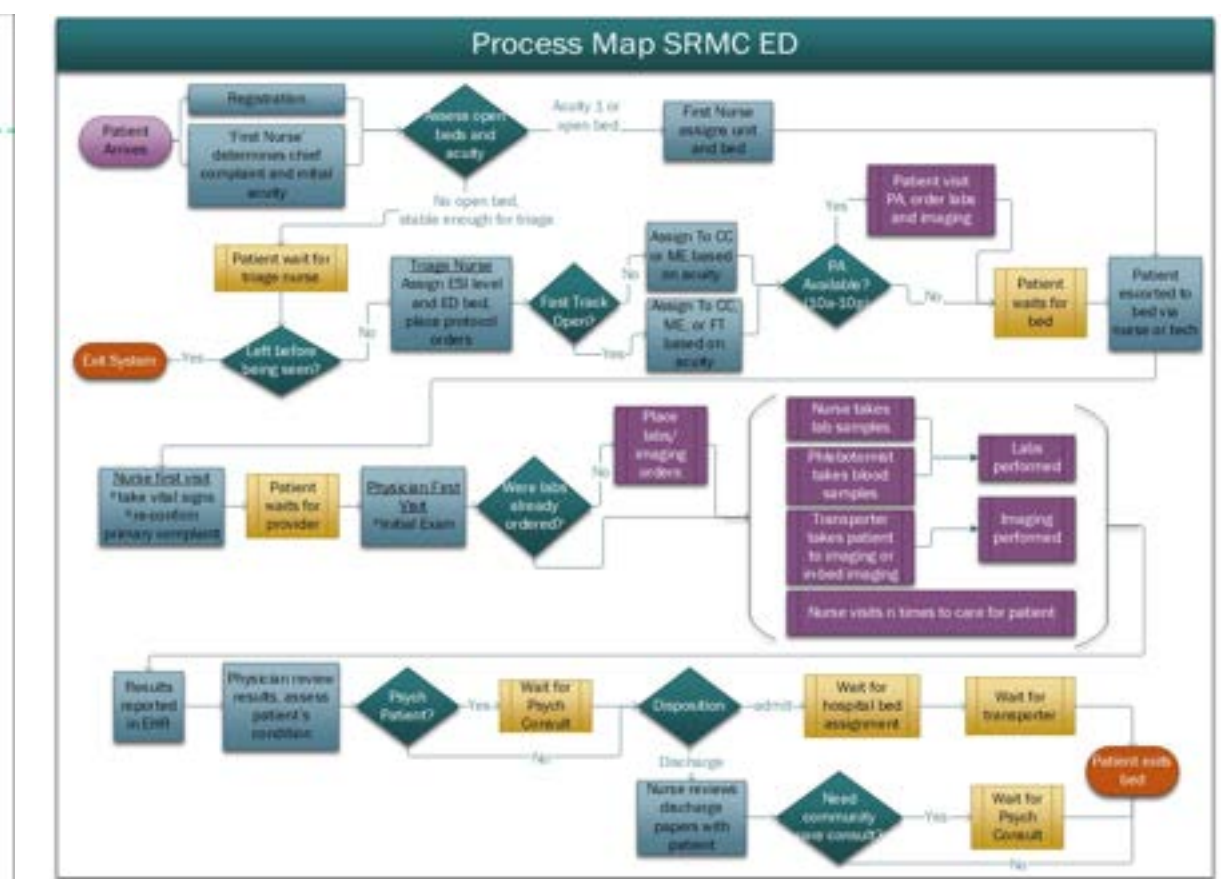

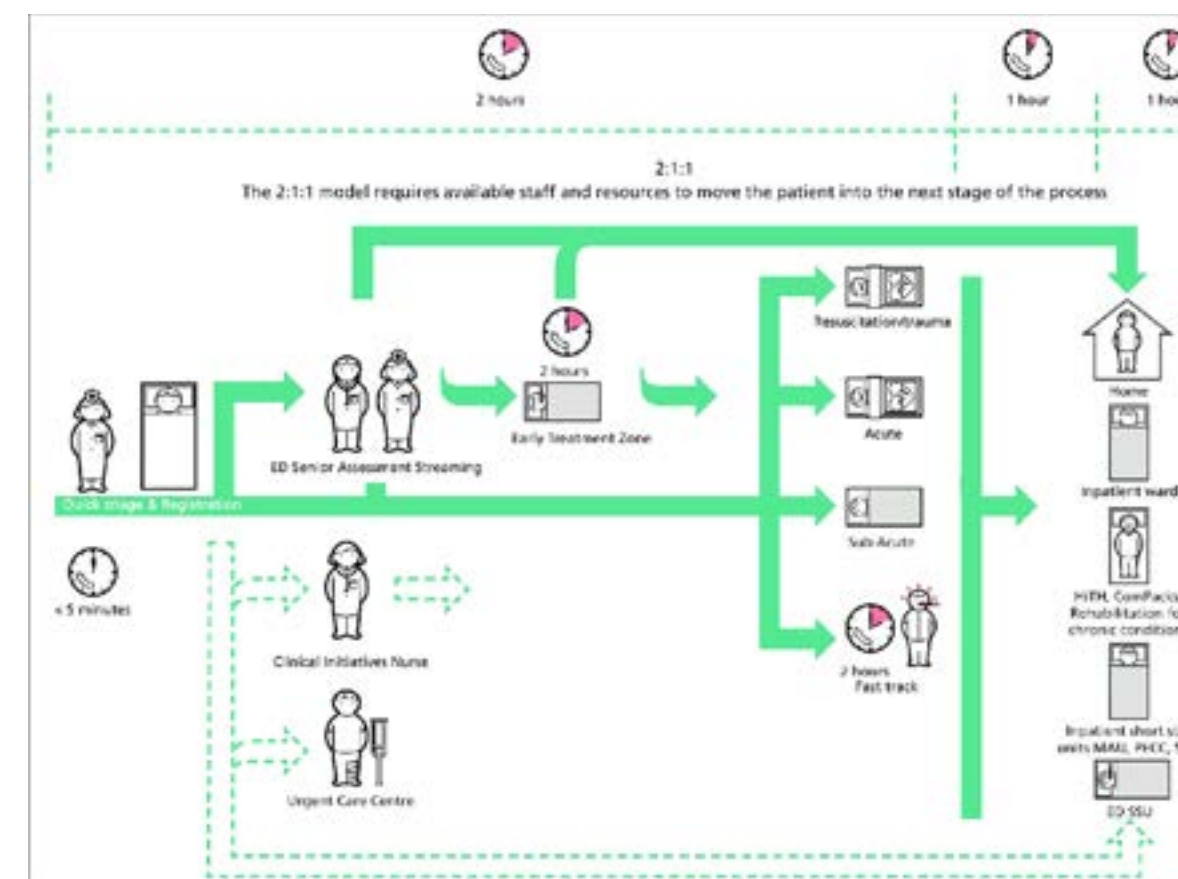

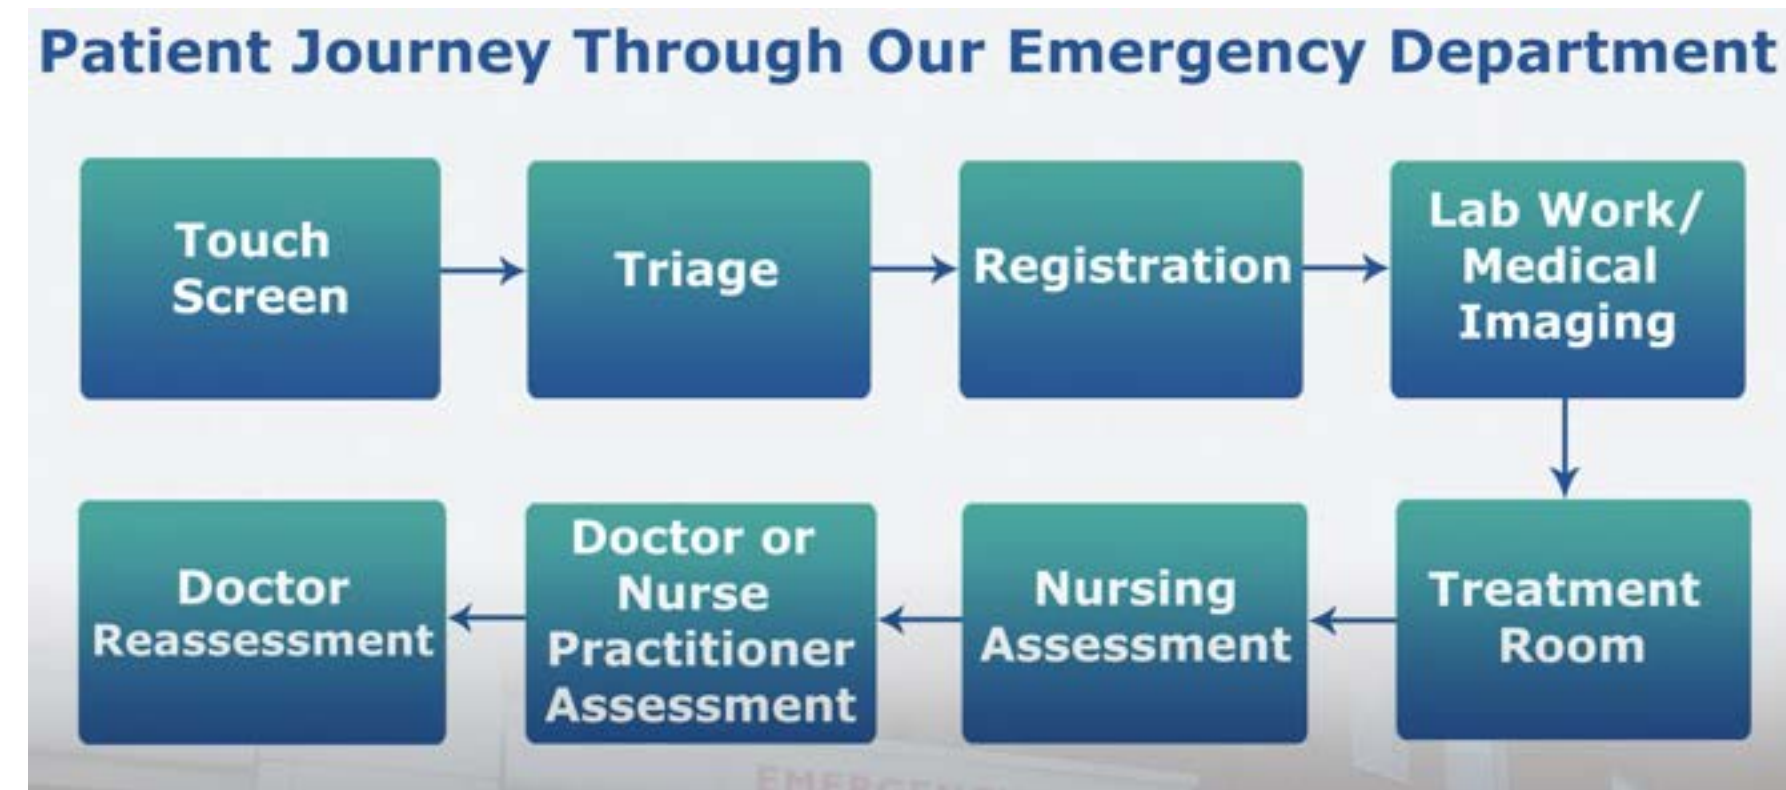

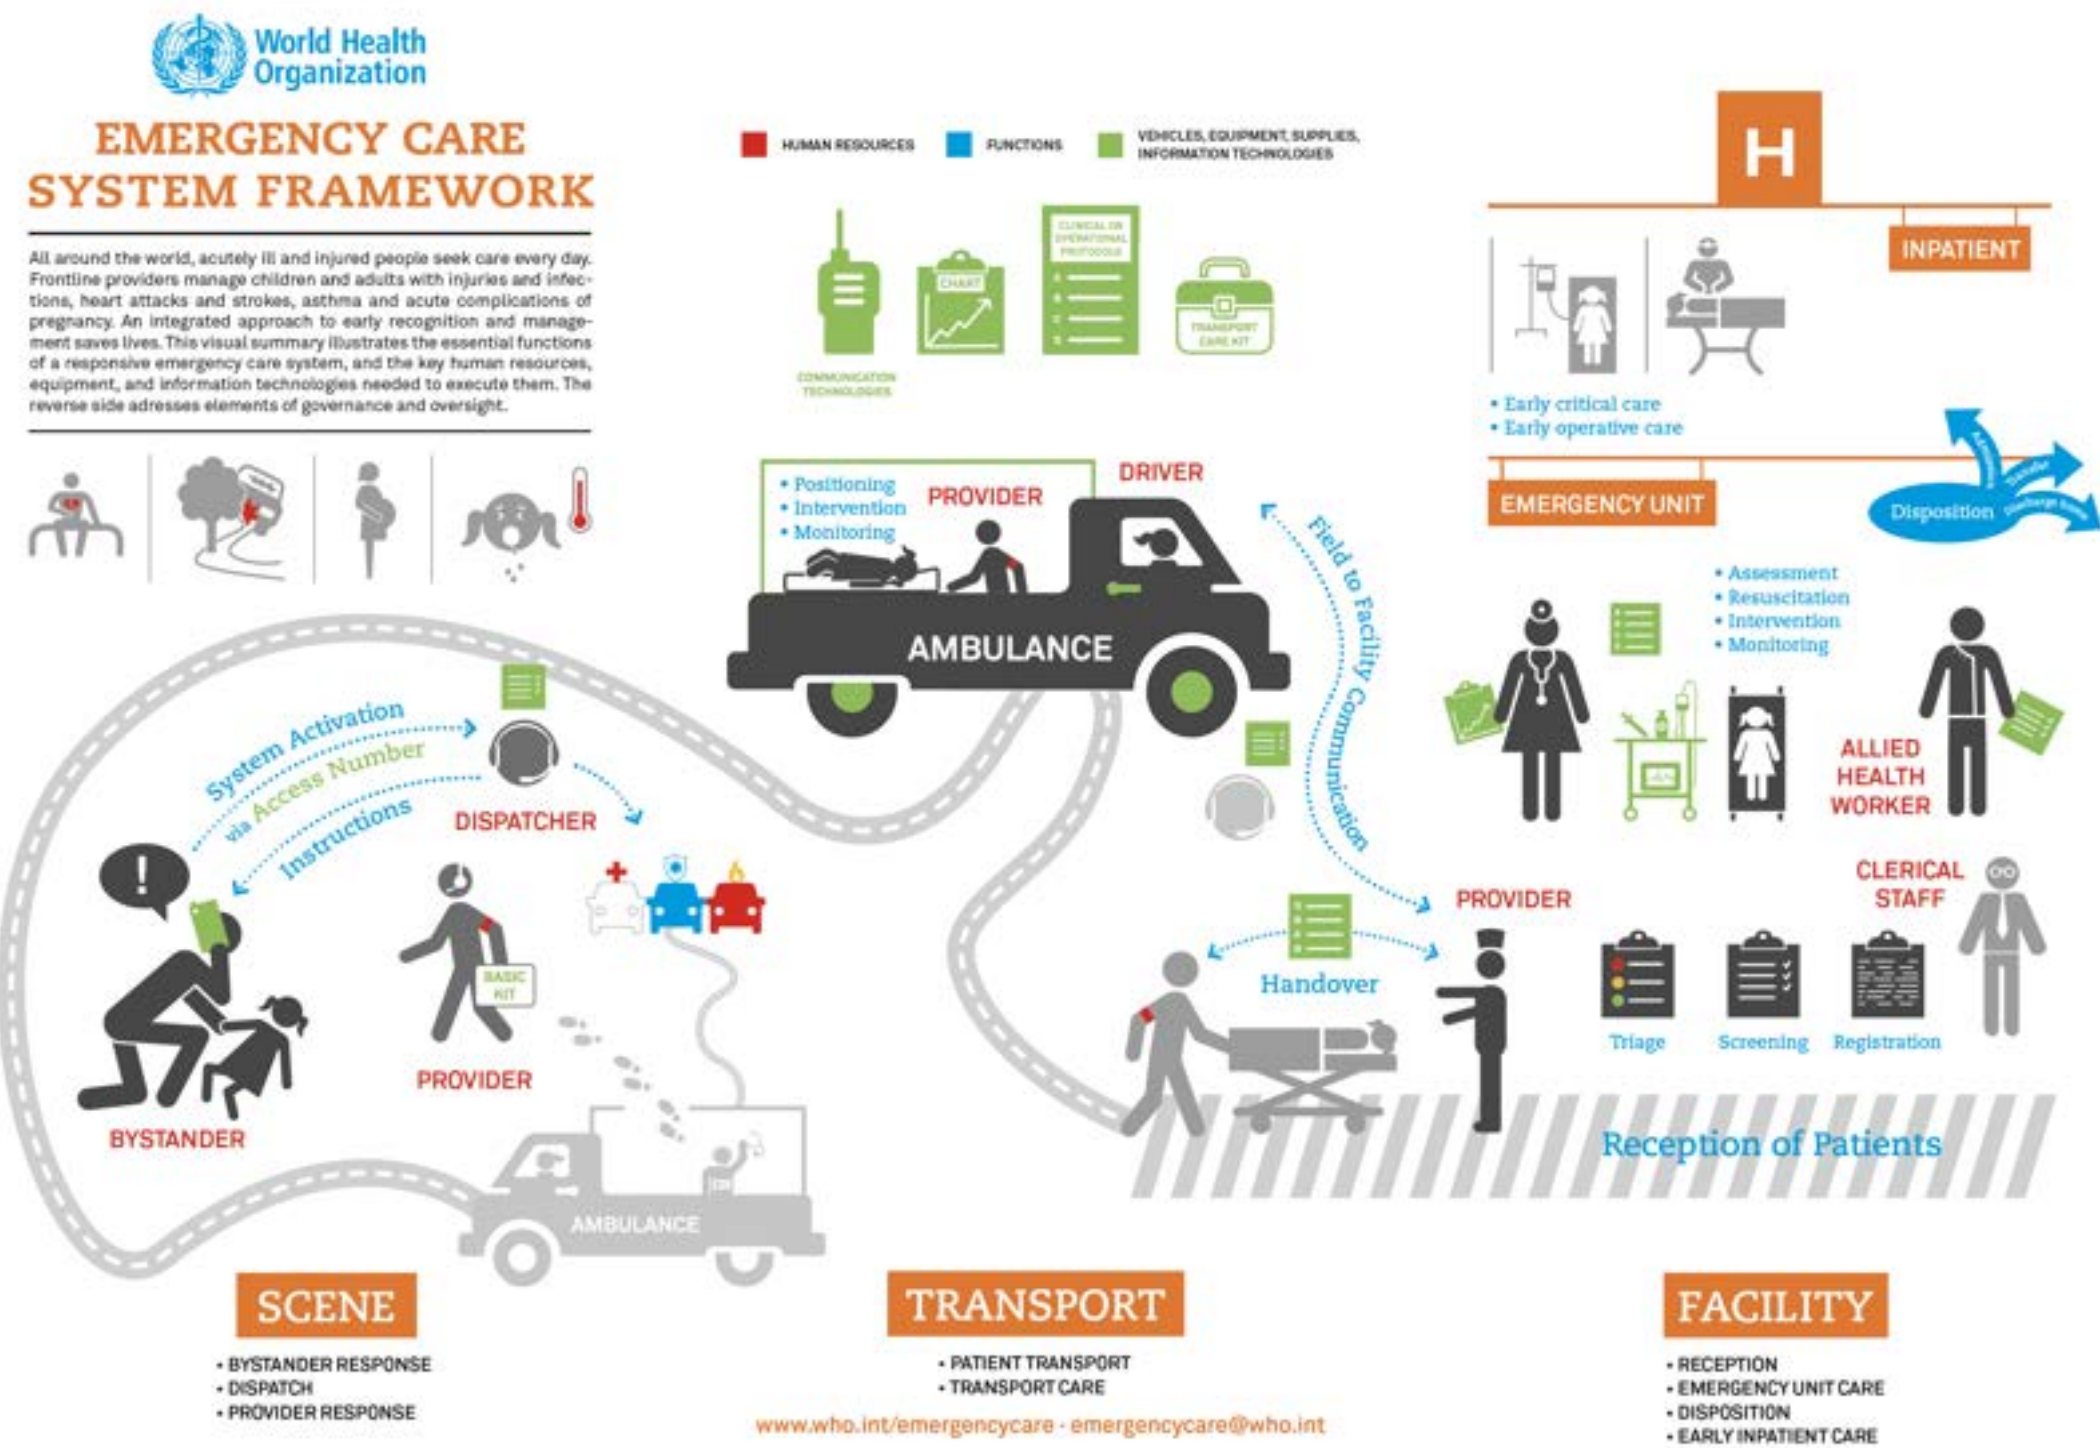

### Green (4) discriminators

- Warm person (T < 38.5°C)
- Recent mild pain
- Recent problem (> 7 days) – green or blue

# INTERVIEW

---

To understand the journey from a patient's view, we interviewed a student who had been to Candler Hospital's emergency unit. We asked some questions related to the journey, touchpoints and physical evidence.

## Medical condition

### **Describe medical condition: why he had to visit the emergency room?**

He could not hear and ear was bleeding

## Place

### **Which hospital did he visit? Name & location**

Candler Hospital-Emergency Department  
5353 Reynold St

### **Why did you visit this hospital?**

Because this was the nearest emergency department at that time

### **How did you get there?**

His friend drove to him

### **Who did you go with?**

With his roommate and a friend

## Journey

### **Can you describe the process in Emergency room?**

In fact, he went to the general clinic several times before going to the emergency department and did not improve, so he chose to go to the emergency department.

He didn't make an appointment that just arrive there directly. After arriving at the hospital, he lined up to the front desk to describe the specific situation, and then the staff gave him a bracelet with his name and number printed on it. After that, he waited for the nurse to call his name in the hall. After calling his name, the nurse took him to the doctor's office. The doctor asked the specific information and prescribing medicine.

## Billing

### **How much did you spend?**

### **How was the billing process?**

It was free because of the insurance.

No billing, give medical insurance card when registering at the front desk. After taking the prescription, he could leave directly

# INTERVIEW

---

## Time

### **How long did you wait?**

Because it is not particularly serious, he waited for almost an hour

## People

### **Who did you meet during the process?**

One is the staff who registered his information at the front desk, and the other is to take him in and wait for a nurse who will collect his basic information such as blood pressure, and then the doctor who shows him a doctor in the ward. Because doctors who see a doctor will change doctors according to their needs. For example, if there is a problem with his ears, a attending doctor adds another assistant to wash his ears.

### **How does the staff there?**

The staff's attitude is very friendly, they asked him if there is any uncomfortable place

## Item

### **What kind of items did you touch?**

He didn't know what the names were. There were cotton swabs, alcohol, and then there was a equipment which is similar to flashlights to illuminate the ears, and it had a magnifying glass in front. Also, ear spoons and a machine washed his ears.

## Instructions

### **What kind of instructions did you have to follow?**

The doctor opened the ear drops and gave him a list. There are medicines and locations on the list, and there are time to re -diagnosis.

# OBSERVATION

Place: Candler Hospital's emergency

Date: Sep 20

Time: 18:00-18:30

Temperature: 80~85°F

Medical room

# PATIENTS JOURNEY MAP

From our reasearch and interview we mapped out the patients journey at the emergency department at Chandler hospital, this gave us insights of moments that could be improved for the patient

# LAYOUT SETUP

LOGO Prototype to clarify the scale of space, the size of props

## SCENE

1. entrance
2. counter
3. nurse station
4. reception
5. treatment room

## PROBS

1. beds
2. sits
3. counter
4. computers
5. screens
6. equipments
7. desks

## ROLES

1. protagonist
2. nurses
3. doctors
4. patients

## EMOTIONS

1. Anxious
2. Uncertain
3. Distrust
4. Worried
5. Complaints

## ITERATIONS

- Remove surgery space
- Add Ambulance entrance
- Add server treatment room
- Add doctor offices
- Rearrange the lab layout

# SCRIPT

We created a script for each characters and the narrative.

**Roles** Narrator - Priyanka | Patient - Heidi | Nurse - Wendan | Doctor - Siyun | Video - Chongyuan

## Patient walks into the ER

Alice is a SCAD student who lives in SAV. One evening, Alice was feeling pain in her ear. She touched her ears and found it was bleeding. She panicked and rushed to the nearest Emergency Unit.

A: "My ear is bleeding. Oh its so painful. I need to see the doctor as soon as possible."

## Walks through the main door

Alice books an uber and leaves for the emergency. She walks into the emergency unit and approaches the reception desk.

N: "How can I help you?"

A: "My ears hurt, it is bleeding."

N: "Let's us see it. What's your name?"

A: "Alice Jones"

N: "Great, What's your birth day?"

A: "1998.03.17."

N: "Do you have insurance?"

A: "Yes. I have student insurance."

N: "Can you tell me the number on your insurance card?"

A: Show the photo to the nurse. "This is my insurance card."

N: "Thank you! Please wait a minute." Typing..... Give back the phone to the patient.

N: "Ok, Here is your bracelet. Please wait in the waiting area until the TN calls your name"

A: "Thank you!"

## Go to waiting room

Alice goes and sits at the waiting area. After a while, she feels thirsty. She notices the vending machine and buys a bottle of water. Alice keeps looking at her phone.

A: "Oh my god, It's 6:00 pm right now, I have been waiting for an hour! My ear is bleeding and my throat is thirsty, everything feels so long."

## Triage nurse's call

Alice continues waiting until the TN shows up and calls her name.

TN: "Alice Jones" No one answers.

"Where is Alice Jones?"

A: " I am here!"

TN: "Come with me!"

## Go to the triage place and triage nurse would ask you questions and give level

Alice follows the triage nurse.

TN: "Hello, Alice. How do you feel now?"

A: "It is painful and my ear is bleeding."

TN: "Can I check your ears?" Alice shows her ears.

TN: "Do you know when it happened and why?"

A: "This afternoon, I was at home. Suddenly, i felt my ears pain, it was bleeding when I touched it. But I don't know why."

TN: "All right. Let's have some basic exams at first."

A: "Ok."

TN put the blood pressure monitor on her finger and typed the results in her computer and puts her under the "Urgent" proprity group and takes her to the treatment room

TN: "Follow me, Let me take you to the treatment room."

## Nurse would take you to a treatment room

TN: "Just wait here. The doctor will be with you soon"

A: "OK."

TN left the room.

## Stay in the room

A few mintues later, the doctor came in with diagnostic test in his hand.

MD: "Hi, Alice. I am Dr. Cody. I will help you treat your ears. Can you tell me what you are feeling?"

A: " Hi, Cody. My ears hurts really bad and its been bleeding."

The doctor asked her several questions about her symptoms, medical history and allergies.

Then, The doctor checks the areas around her ear, nose and chest.

MD: "Okay. i am going to recommend an X-ray examiation to make sure everything is clear. Please wait here. I will send the nurse, she will take you to the lab."

## Be called to the labs to take tests (x ray)

A few minutes later, the nurse came to the treatment room and takes her to the lab.

RN: "Alice, please come with me. I will take you to the lab"

Walk to the X-ray lab.

The nurse then told her:

"Please remove all of your metallic accessories, phones, electric items and leave them in the tray here."

Alice took off her jewelry and puts the phone in the tray.

RN: "Please raise both your hands. Put your body in front of the X-ray scanner and please don't move for 5 seconds."

A: "OK."

RN: "Perfect you're all done. I will send the scans to the Doctor. You can wait for the doctor in the treatment room"

Alice goes back to the treatment room

## Doctor receives your test result

She waits in the treatment room for a while. And the doctor calls her to his office.

MD: "I just received your test results, everything is fine. Nothing to worry. Seem like you have an ear infection. I am prescribing some ear drops and some antibiotics. you have to take them twice in a day after your meals.

A: "Where do I get the medicine from?"

MD: "you can pick it by the pharmacy window. Just go straight the aisle and turn right. You will see the pharmacy."

A: Thank you Doctor!

## Payment

After the diagnosis, Alice went out the room and quickly find the pharmacy pick-up.

PN: "What's your name?"

A: "Alice Jones"

PN: "OK, just a minute. Let me get your medicines. Here you go."

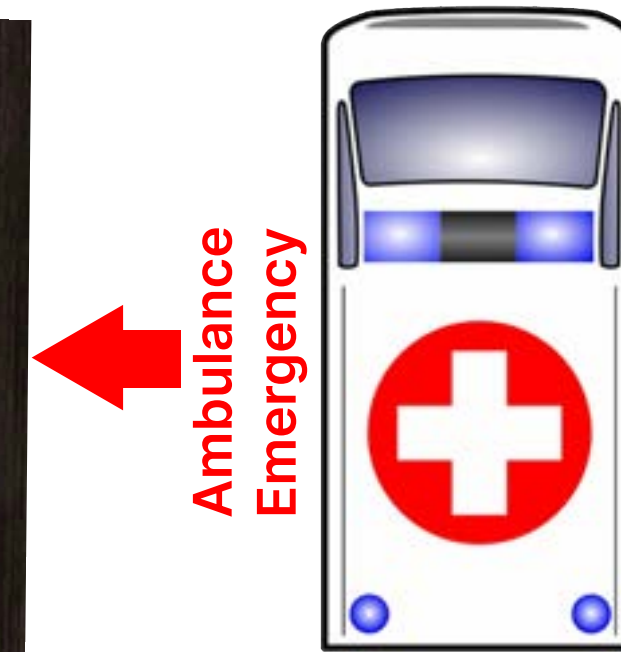

A: "How about the other fees?"

PN: "We will send you the bill within 6 business days to your email."
